

README

Thank you for purchasing the **FPS Animation Framework**! This asset includes 2 versions of the framework:

- *Legacy*.
- *Scriptable Animation System*.

Using a **Scriptable Animation System** is recommended, as it is up-to-date, and will receive new updates in the future. The Legacy package will not be updated, and it only exists for compatibility reasons.

If you are reading this, you have already imported the **Scriptable Animation System**, and you can use it right away! However, if you need the previous framework version, please use the *FPSAnimationFramework_Legacy* package.

To get started, make sure to follow these steps:

1. Get the GitHub demo project for [Scriptable](#) or [Legacy](#).
2. Get the documentation for [Scriptable](#) or [Legacy](#).
3. Open up the demo project and import the **Scriptable** or **Legacy** package.
4. Double-click on the desired package and import the content.
5. All errors should be gone at this point.
6. Rebuild the lighting and you are good to go!
